Summary

Full Stack Developer with 3+ years of experience designing, developing, and deploying scalable web applications using modern frontend and backend technologies. Strong understanding of software architecture, performance optimization, and clean code practices. Experienced in working across the full development lifecycle, collaborating with cross-functional teams, and delivering reliable, user-focused solutions in fast-paced environments.

Skills

- **Frontend Technologies:** React.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Backend & APIs:** Python, Django, Node.js, REST APIs, GraphQL
- **Databases:** PostgreSQL, MySQL, Redis
- **Cloud & DevOps:** AWS, Docker, GitLab CI/CD
- **Build & Tooling:** Webpack, NPM, Git
- **Testing:** A/B Testing, Unit and integration testing (Jest, React Testing Library)
- **Development Practices:** Agile, Accessibility (WCAG), Code Reviews, Performance Optimization, Feature Ownership

Experience

- **Full-Stack Software Developer at Screenz.ai** (Jan 2026 - Present)
 - Built scalable, high-traffic web applications using React, Next.js, Node.js, and PostgreSQL to deliver responsive and performant user experiences that support thousands of concurrent users.
 - Built secure REST APIs supporting frontend applications and backend services.
 - Collaborated in Agile teams, participated in code reviews, and contributed to CI/CD pipelines.
 - Contributed to architectural discussions around access control models and enterprise-grade security standards.
- **Frontend Engineer at SignalX** (Jul 2022 - Aug 2023)
 - Delivered scalable frontend features by building modular React and TypeScript components, improving overall page load performance by 20%.
 - Collaborated with product managers and designers to implement customer-facing features, contributing to a 10% increase in user engagement within six months.
 - Implemented automated testing using Jest and React Testing Library, decreasing production defects by 40%.
 - Supported deployment pipelines and participated in maintaining production systems.
- **Software Engineer at Localytee** (Aug 2020 - Jul 2022)
 - Key engineer for Question, a Q/A platform powered by React, Django, AWS, PostgreSQL, WebSockets.
 - Developed and maintained an internal, reusable UI component library with documented APIs, reducing development time by 30% across multiple teams.
 - Implemented real-time communication protocols (WebSockets) to enable live notifications and chat interactions.
 - Optimized PostgreSQL queries and GraphQL resolvers, improving API response times by 25%.

Projects

- **Personal Landing Page** (Mar 2025 - Apr 2025)
 - Built a production-grade personal portfolio using React, Motion JS, and reusable component architecture.
 - Focused on mobile-first layouts, usability, accessibility, and clean UI.
- **Pokedex** (Apr 2022 - Apr 2022)
 - Built a responsive data-driven interface with search, filtering, and dynamic UI updates using React and Material UI.
 - Implemented reusable components and state management using MobX; integrated PokeAPI for real-time data.

Education

- **Postgraduate Certificate in CyberSecurity** (Sept 2023 - Dec 2024)
George Brown College, Canada
- **Bachelor's in Computer Science** (Aug 2016 - Dec 2020)
Yogananda College of Engineering and Technology, India

Extra-Curricular Activities

- **Superprof Ambassador Tutor:** Global programming mentor (2025)
- **Founded a Non-Profit:** Supporting underprivileged communities in Toronto (2025)
- **Freelancer:** Delivered full-stack web development projects (2024)
- **Best Project Award:** RISET International Conference (2020)
